present

Destruction of the Three World Trade Center Skyscrapers: *The Case for Controlled Demolition*

Over 1250 degreed, Architecture and Engineering Professionals have signed a petition calling for a new investigation

The law of angular momentum says if rotation begins, it will continue falling over unless an opposing force is applied. It should have fallen.

**Tuesday, October 5th
6:00 to 8:15 PM**

Middletown Public Library
123 Broad Street
Middletown, CT 06457

**Dynamic Multi-media
Presentation**

Collapsing material is explosively ejected, not contained within the strong steel frame that would have funneled falling debris

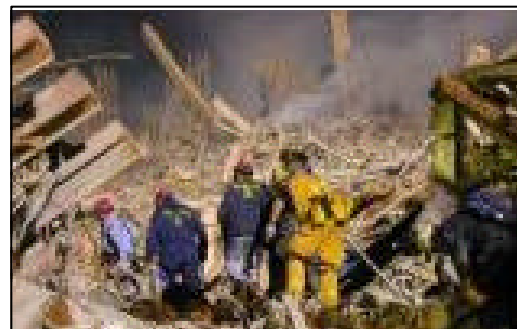

- Focuses exclusively on the physics and engineering of the destructive collapse of the three WTC skyscrapers
- AE911Truth held a press conference on February 19th in San Francisco, and in 41 cities around the world, to announce that more than 1,000 architects and engineers now support the call for a new independent investigation
- We demonstrate the official story of fire induced structural failure, followed by catastrophic gravitational collapse is untrue
- Calling for a grand jury investigation of two NIST officials, Shyam Sunder and John Gross, due to the demonstrably "insufficient, contradictory, and fraudulent" nature of the 9/11 reports they oversaw
- The destruction of the three WTC buildings by controlled demolition is consistent with all the available data
- AE911Truth stops short of the how the demolitions could have been implemented ... and who was responsible. Those are questions for a real investigation and not a topic that we architects and engineering professionals are trained to

pursue. We are comfortable with the laws of physics; not with hypothesizing and investigating the motivations of people.

- The work at AE911Truth is dedicated to the victims, families and all others throughout the world affected by the tragic events of September 11, 2001 and its aftermath

Gravitational collapse of a building leaves identifiable structures and chunks of material, not dust (Chilean earthquake Feb 28, 2010)

Ground Zero on September 11th No building structures are seen that would indicate structure failure followed by gravitational collapse.

AE911Truth's DVD may be purchased or available for check-out at your library
