

The Golden Rule Sails for a Nuclear-Free World & Peaceful, Sustainable Future.

Join Us in Welcoming Her to New Haven!

Beginning with an attempt to block the the Pentagon from destroying Pacific islands with thermonuclear explosions in the 1950s, the Golden Rule now plies the oceans that protect our country. Long focused on the Pacific Ocean the ship is on a years-long tour of the midwest and the east coast.

The crew has given hundreds of educational presentations about nuclear and environmental issues and led many peace flotillas. Thousands of people have visited the Golden Rule.

This is its first visit to Connecticut. You are invited to important public events at the New Haven Peace Garden, the Sound School and Long Wharf Pier.
